Factories Acts.	13
Riparian Local Authority.	14 -16

I am deeply grateful for the courtesy and consideration
extended to me by Members of the Council and for the co-operation
of my colleagues on the Council staff, especially Mr. Prescott, the
Public Health Inspector, who retired on 8/10/59, and Mr. Kennaugh,
who succeeded him, for their assistance in the preparation of this
report.

I am, your obedient servant,

Medical Officer of Health.

SANITARY CIRCUMSTANCES OF THE AREA.

Water Supplies.

There are two sources of supply, namely, Rhode Barton and Pinhay. The former, owned by the Council is from shallow springs with a maximum yield of 48,000 g.p.d., while the latter, owned by the Lyme Regis District Water Company, is from deep springs with an average yield of 750,000 g.p.d., Under agreement, a maximum of 50,000 g.p.d. is taken by the Council from the Company through break pressure tanks and valves, with an arrangement to increase this amount up to 150,000 gallons when required.

Certain areas of the District at high levels, are supplied direct by the Company, and this consumption is not recorded in the figures given below.

Both supplies are chlorinated, and at Rhode Barton, pumping and chlorination are automatic by electric control.

The quarterly consumption from both sources was as follows :-

	<u>Pinhay.</u>	<u>Rhode Barton.</u>
1st. Quarter.	6,165,370	4,209,000
2nd. "	7,670,050	4,257,000
3rd. "	10,149,780	4,379,000
4th. "	5,978,740	4,195,000
	<u>29,963,940</u>	<u>17,040,000</u>

Compared with 1956 the Council in 1957 took 2,653,890 gallons less from the Company and 2,269,000 more from Rhode Barton.

11 samples were taken for analyses. Of these 7 were satisfactory and 4 unsatisfactory. The latter were all from the Rhode Barton source.

<u>Hardness.</u>	<u>Pinhay.</u>	<u>Rhode Barton.</u>
Total Hardness.	13.0 degrees.	2.8 degrees.

Over 90% of the houses have water laid on and the remainder are supplied from outside taps.

Water Act. 1945 Byelaws.

These Byelaws are enforced in the Borough.

West Dorset Joint Water Committee.

As the result of the Ministry of Housing and Local Government circular 52/56 regarding the grouping of water undertakings, meetings were held between representatives of the four West Dorset local authorities and the Dorset County Council, to consider the setting up of a West Dorset Joint Water Board. A report from the County Public Health Engineer in which a case on engineering grounds for the setting up of a Joint Undertaking was put forward. At one of the meetings three representatives from the Ministry attended.

A Joint Water Committee was set up comprising the Borough of Bridport and the Rural Districts of Bridport and Beaminster and the Dorset County Council, Lyme Regis Borough Council having decided to go in with the East Devon Water Board.

East Devon Water Board.

In December, 1957, a meeting was held at Honiton to consider re-grouping in East Devon. This meeting was called by the East Devon Water Board at the request of the Minister of Housing and Local Government and was attended by representatives of the East Devon Water Board and six local authorities. The proposed reconstitution of the Board to cover the area from Lyme Regis to Dawlish was discussed and it was agreed to appoint Parliamentary Agents and Financial Advisers to prepare a draft Scheme and Order for consideration by each of the authorities.

Drainage and Sewerage.

The developed areas of the Town are on the water borne carriage system, largely combined soil and surface, with the exception of the post war housing estate which is on the separate system, and all new properties, where practicable, are now being dealt with on the latter system. One small area, Ware Lane and one camping ground, are dealt with on separate tanks and filters; the septic tank and filter at Ware Lane have been renewed. The Council's seasonal Monmouth Beach area has part water borne system and part Elsan, the latter being collected twice weekly.

Over two thirds of the drainage of the Town is received and discharged into the sea below the low water mark by the Eastern Outfall (18" cast iron sewer) across Broad Ledge, installed in 1900. This sewer from the mouth of the river Lym to its outfall has very little fall.

The Cobb area is dealt with by a 9" sewer discharging into a 12" cast iron sewer carried out beyond low water mark west of the Cobb.

The 9" portion of this sewer, glazed stoneware pipes, is situated in the movement area of Cobb Road and requires constant inspection and repair. 120 feet of the sewer has been relayed in 10" diameter steel tube and two inspection manholes constructed. Four underground sources of water were intercepted and picked up and two further streams of water above the road fracture were also intercepted and diverted into the sewer by the Dorset County Council.

Public Lavatories.

Accommodation is provided for both sexes in five blocks at the Square, Marine Parade, Cobb Harbour, Monmouth Beach, one small block for men at the Victoria Pier, and also a separate block at the Monmouth Beach for the use of the Sandboy huts and caravans.

Parts of the Ladies' accommodation at the Square, the Ladies' and Gents' at the Monmouth Beach, and the Sandboy huts, are closed during the winter.

Public Cleansing.

A weekly collection is made of household and trade refuse by one lorry, and in the summer, additional collections are made in the business areas of the Town as required. The refuse is disposed of at a tip on the cliffs east of the Town. All main streets are swept daily. Gullies are cleared on the Borough roads by the Council and on classified roads by the County Council. Litter baskets are provided in parts of the Town and Beaches.

Swimming and Bathing Pools.

There is no indoor swimming bath. Bathing takes place in the sea during the season from all beaches, and dressing accommodation is available from huts and tents on the main beach.

Rodent Control.

No full-time Rodent Operator is employed. One of the Council's workmen who has attended training courses, deals with the Council's drains, sewers, refuse tip and premises, and also private premises on receipt of complaints. Several sewer surveys were made and baitings carried out with the help of the Divisional Rodent Officer.

Camping Sites.

There is one camping site of $7\frac{1}{2}$ acres, situated on the hill to the north of the Town with 150 caravan sites licenced for summer use only, and winter storage for 100 caravans. It is very well maintained, and equipped with water points, drainage points, washing facilities with hot and cold water in well constructed premises, and efficient water borne lavatory accommodation.

On the Monmouth Beach, owned by the Council, there exists a collection of day huts, caravans and chalets for summer use only. Water is supplied by standpipes at various points. On the same beach, the Council own and let 28 residential chalets for seasonal letting. These are laid on concrete foundations with asphalt paths in three terraces around walled-in lawns. Each chalet has an independent water supply, electric lighting and cooking, food cupboard, trapped sink, and drainage connected to the public sewer system. Lavatory accommodation, water borne, is provided at the rear in a separate block of buildings and drains to the public sewer. The rest of the site is dealt with by Elsan closets collected twice weekly by the Council.

The work in converting the Cobb allotment site into a chalet site was completed during the year and 19 chalets were erected, main drainage was laid on, and a hard-core roadway constructed.

Schools.

These are regularly inspected. All have piped water, water closets and washing facilities. Pasteurised milk was being supplied to all schools at the end of the year.

INSPECTION AND SUPERVISION OF FOOD.

Meat Inspection.

There is no slaughterhouse in the Town. Most of the meat is obtained from the slaughterhouse in Bridport Borough, and the Council pay part of the cost of meat inspection at this slaughterhouse.

Housing Survey.

The recent survey of houses in the Borough showed that there were 78 houses in Class 4, 67 in Class 3, 5 in Class 2, and the remainder of those inspected came within Class 1.

PREVALENCE OF, AND CONTROL OVER, INFECTIOUS AND OTHER DISEASES.

The year was a light one as far as Notifiable Infectious Diseases was concerned. It is interesting to note that Whooping Cough occurred in a woman aged 67 years.

There were no cases of Food Poisoning.

Close co-operation was maintained with the Head Teachers and School Nurses regarding the control of Infectious Diseases in schools.

Immunisation. (Diphtheria, Whooping Cough, Smallpox, Poliomyelitis).

This is the responsibility of the Dorset County Council. When not performed by the child's own doctor, immunisation is given at the schools and Child Welfare Centre. 28 children were given their primary and 26 their reinforcing inoculations against Diphtheria; 23 their primary and 9 reinforcing inoculations against Whooping Cough; 41 their primary and 10 reinforcing vaccinations against Smallpox, and 125 given their primary vaccinations against Poliomyelitis.

B.C.G. Vaccination against Tuberculosis.

The County Council are also responsible for this vaccination. Children, aged 13 years, are tested and when necessary, are vaccinated at the schools which they are attending or at the local County Council Clinic.
